

PROJECTS

SERVICE HUB: IOS MOBILE APP UX/UI & INTERACTION DESIGN

- Designed an iOS platform catering to seniors and caregivers, establishing a **dual-user framework featuring shared trust protocols**.
- Engineered a **26-screen Figma prototype** across 4 iterations, integrating onboarding, scheduling, emergency undo windows, and monitoring tools.
- Executed user research sessions to **validate credential verification indicators** and prioritize real-time arrival updates.

ALLTRAILS: GROUP HIKE FEATURE DESIGN & UX RESEARCH

- Designed a peer-to-peer social hiking function for AllTrails’ mobile platform (65M+ user base), enabling members to **organize, locate, and participate in excursions** seamlessly within the primary hub.
- Independently spearheaded end-to-end design strategy over 4 weeks, delivering competitive audits, behavioral personas, user pathways, and a **13-screen interactive Figma prototype**.

MONOCOQUE MAGAZINE: INDEPENDENT PUBLICATION EDITORIAL DESIGN

- Lead an end-to-end editorial design and art direction for an independent Formula 1 publication over 4 months, managing target demographic research, content strategy, and **production-ready print layouts**.
- Developed a **high-contrast visual typography framework** using Adobe InDesign, Photoshop, and Illustrator by pairing Avant Garde display headers with Cormorant Garamond body type.
- Delivered a **comprehensive publication suite** comprising front cover art, contents pages, feature spreads, subscription collateral, alongside multi-format digital promotional banners.
